**CHEMISTRY—WHO NEEDS IT!**

In days of yore, man clothed himself by wrestling a sabre-toothed tiger for its skin. He lived in a split-level cave complete with wall-to-wall moss. Disease? He cured his ailments with a home-brew of hats' wings, swamp water, and toadstools. He had no need of chemistry. But you do! Chemistry is at work everywhere, helping you at your job, protecting you and your family at home—adding new dimensions to almost every aspect of your life.

New "wonder" drugs and antibiotics guard your health. Plastics add new color and utility to your home as well as keep the food you buy fresh and clean. Synthetic fibers add more life to the clothes you wear. Chemicals in paints, polishes, and detergents make household chores less burdensome. The list is long—and growing longer every day! Chemistry gives you a good life today . . . promises a better one tomorrow!
